

Bruno Aguilar

Software Engineer • AI & Full-Stack

adelfetner.com • github.com/AdelFetner • linkedin.com/in/brunoagdev • bruno@adelfetner.com

SUMMARY

Product-minded software engineer focused on AI and full-stack (Next.js, Node.js, GraphQL, AWS/GCP): led MCP development and built AI automations and AI-augmented products. 4+ years in web products and 0-to-1 platforms, leading teams. Hungry to build products that move the needle.

EXPERIENCE

Gobierno de la Provincia de Santa Fe

Software Engineer, Secretaría de Tecnologías para la Gestión

Santa Fe, Argentina • Hybrid

May 2026 – Present

- Build AI automations that reduce manual review time, handling 100 requests per day
- Develop solutions that streamline processes and shorten response times across departments

Coderhouse

Instructional Staff • Course Creator

Remote

Apr 2026 – Present

- Teach the Full-Stack program to commissions of 100–150 students and mentor them
- Created a course on AI applied to marketing, covering Growth Marketing and AI Agents

Crombie

Software Engineer

Santa Fe, Argentina • Hybrid

May 2025 – May 2026

- Built from 0 to 1 a multi-tenant user management platform for an oil company across LATAM: hundreds of service stations with dozens of employees each
- Led the development of an MCP server for a global AI platform and ran technical meetings with clients
- Implemented bulk user data import and export services on AWS S3

Full-Stack Developer

Nov 2024 – May 2025

- Led a team of interns, driving product quality, technical standards and Git Flow versioning
- Built enterprise applications with Node.js, NestJS, TypeScript, React and Next.js
- Delivered on AWS and GCP

Polilat

Software Developer

Argentina

May 2024 – May 2025

- Developed systems for national public institutions
- Delivered AI solutions and AI-augmented products across the full client portfolio
- Worked on an AI product with XR/VR for a Mexican state
- Led client meetings to gather requirements, define scope and present progress

No Country

Frontend Developer (Internship)

Argentina

2023 – 2024

- Built an adoption platform with React and Next.js in a cross-functional team of Frontend, Backend and QA
- Led teams across projects, applying agile practices and Git branching strategies

Freelance

Frontend Developer

Argentina

Feb 2022 – Dec 2023

- Built custom Next.js systems for clients, with forms and automations that digitized their processes

SKILLS

Stack: TypeScript, JavaScript, Node.js, NestJS, React, Next.js, GraphQL, .NET, MCP

Cloud & tooling: AWS, GCP, Turborepo, Git Flow • **Languages:** Spanish (native), English (fluent)

RECOGNITION & CERTIFICATIONS

- Speaker: in-house talks for coworkers and for communities and tech events, reaching hundreds of people; contributor to tech events and open source projects
- 1st place in **GitHub** (2024) and **CodeRabbit** (2026) competitions at Nerdearla, among hundreds of developers
- Apollo GraphQL Graph Developer Associate certification

VOLUNTEERING

Cáritas, Software Engineer, led the software team of a volunteer lifecycle management project

2025 – 2026

XIII South American Games Santa Fe 2026, Technical Volunteer

2026

- Operated daily-life software systems at the South American Village

EDUCATION

Universidad Tecnológica Nacional (UTN), Information Systems Engineering (in progress)

2024 – Present
